HCO BULLETIN OF 14 MARCH 1971R

Re-mimeo
All Levels

CORRECTED & REISSUED 25 JULY 1973
(Only change being word, "by" in paragraph 4 changed to "but.")

F/N EVERYTHING

Whenever an auditor gets a read on an item from Rudiments or a prepared list (L1C, L3A, L4B, etc., etc.) IT MUST BE CARRIED TO AN F/N.

To fail to do so is to leave the PC with by-passed charge.

When a PC has had several reads on various lists which were none of them carried to F/N, it can occur that he will become upset or depressed without any other apparent reason. As one has DONE the lists without F/Ning each item, one now has the mystery of what is wrong?

The error is reading items from rudiments or prepared lists cleaned to no read but not carried to F/N.

This action (amongst many such refinements) is what makes Flag auditing so smooth and indeed makes it Flag Auditing.

When an auditor first tries this he may well think it is impossible.

Yet it is simplicity itself. If you know bank structure you know it is necessary to find an earlier item if something does not release. What has been found as a read on a prepared list would F/N if it were the basic lock. So if it doesn't F/N, then there is an earlier (or an earlier or an earlier) lock which is preventing it from F/Ning.

So the RULE:

NEVER WALK OFF FROM A READING ITEM ON A RUDIMENT OR A PREPARED REPAIR LIST BEFORE YOU CARRY IT DOWN (EARLIER SIMILAR) TO AN F/N.

Example: ARC Break reads. PC says what it is, Auditor does ARCU CDEI. If no F/N, Auditor asks for an earlier similar ARC Break, gets it, ARCU CDEI, etc. until he gets an F/N.

Example: PTP reads. Carry it earlier similar until a PTP F/Ns.

Example: L4B: Has an item been denied you? Reads. Answered. No F/N. Is there an earlier similar denied item? Answered. F/N. Go on to next reading item on the list.

Example: A Green Form assessed once through for reads. The next C/S must take every item on it that read, by 2 Way Comm. or other process, to an F/N.

So there is a much more general rule:

EVERY ITEM THAT READS MUST F/N.

In Dianetics you get the F/N when you run E/S secondaries or engrams to an erasure, F/N, Cog, VGIs.

In Rudiments, every out rud you get a read on is run E/S to F/N.

On a prepared list you take each read to an F/N or E/S to F/N.

On an LX list you run each flow chain to an F/N.

On a Green Form you get by whatever process an F/N.

On Listing by the Laws of Listing and Nulling, your eventual item listed must F/N.

So another rule:

EVERY MAJOR AND MINOR ACTION MUST BE CARRIED TO AN F/N.

There are NO exceptions.

Any exception leaves by-passed charge on the PC.

Also, every F/N is indicated at the conclusion of the action when cog is obtained.

You take too soon an F/N (first twitch) you cut the cognition and leave by-passed charge (a withheld cognition.)

I could take any folder and simply write out the rudiments and prepared list reading items and then audit the PC and carry each one to F/N and correct every list so disclosed and wind up with a very shining, cool calm PC.

So, “Have reading items been left charged?” would be a key question on a case.

Using lists or rudiments on high or low TAs that are not meant for high or low TAs will get you reading items that won't F/N.

So, another rule:

NEVER TRY TO FLY RUDS OR DO AN LIC ON A HIGH OR LOW TA.

One can talk the TA down (see HCOB on Talking the TA Down.)

Or one can assess an L4B correction list.

About the only prepared lists one can assess are the new Hi-Lo TA HCOB 13 Mar 71 and possibly a GF+40 once through for biggest read. The biggest read will have a blowdown on it and can possibly be brought to F/N. If this occurs then one also handles all other items that read.

The most frequent errors in all this are:

Not taking a read earlier similar but just checking it and leaving it as “clean.”

Not using suppress and false on items.

And of course leaving a PC thinking things are still charged by failing to indicate the F/N

Indicating an F/N before the PC’s cognition.

Not going back through the folder to handle rudiments and items that read but were called “clean” or were simply abandoned.

A PC audited under tension of poor TRs has a hard time and does not F/N sometimes, inviting overrun.

The rules then to happy PCs are:

GOOD TRs.

F/N EVERYTHING FOUND ON RUDIMENTS AND LISTS.

AUDIT WITH TA IN NORMAL RANGE OR REPAIR IT SO IT IS IN NORMAL RANGE.
