PURIFICATION RUNDOWN CORRECTION LIST

(We are not concerned with handling bodies on the Purification Rundown; our concern is freeing up the individual spiritually. The data released herein is a record of research results which appeared to be effective in the piloting and developing of the Purification Rundown and, when necessary, its correction. The only dosages recommended on the Purification Rundown or its correction are those classified as food. There are no medical recommendations or claims for it. The only claim is future spiritual improvement.)

(Note: The Hubbard E-Meter is a religious artifact developed for the exclusive use of ordained ministers and theological students who are trained in its use in Church ministrations. It is not intended for and is forbidden by the Church to be used in any medical or physical treatment or the diagnosis, treatment or prevention of any disease. By itself it does nothing and is strictly not to be employed for medical or scientific purposes. Its purpose is to assist the minister to locate in his parishioner areas of travail so that he can assist in the relief of spiritual suffering. The existence and use of the E-Meter is sanctioned by law and the copying of it or attempts by unqualified persons, doctors, scientists, psychologists or psychiatrists to obtain or use one are actionable under law in the United States. To obtain an E-Meter one must be a sincerely enrolled student of the Church of Scientology or a fully qualified minister of that Church and must undertake as well to become wholly skilled in its purpose and use. No other persons are permitted to have E-Meters. The Church permits the E-Meter to be sold, possessed or owned only under these conditions.)

This correction list is for use by a Class III or above Auditor to:

1. Help detect and handle any errors, troubles or bogs occurring with a case on the Purification Rundown which are not rapidly resolving despite the Purification Rundown I/C doing the usual handlings as given in HCOB 6 Feb. 78RD, Purification RD Series 1R, *THE PURIFICATION RUNDOWN REPLACES THE SWEAT PROGRAM* or HCOB 21 May 80, Purification RD Series 5, *PURIFICATION RUNDOWN CASE DATA*,
2. Or, to clean up any bypassed charge on a person who completed the Purification Rundown months or even years earlier but who appears to have some bypassed charge or need further handling in the area.

In the event of a bog or un-resolving snarl on the rundown, the Purification Rundown C/S or the Purification Rundown I/C should send the PC folder to a qualified Class V Graduate (or higher trained) C/S, who can C/S for this correction list to be done by a qualified auditor. (It is highly advisable that any Purification Rundown I/C get himself trained up to at least Class III so that he is then able to assess this list on Purification Rundown preclears who may need it.)

ASSESSMENT

The list is ordinarily assessed Method 3 with each reading line taken to F/N per the instructions. If the PC is severely upset the list may be assessed Method 5, as determined by the C/S.

When assessing the list on a PC who did the rundown at some earlier time, a prefix is used, such as: "On the Purification Rundown, were you . . .?" or "On the Purification Rundown, did you. . .?" as applicable to the question.

HANDLING

Under many of the questions there are two handlings which appear in separate parentheses under the question. Where this is the case, the first handling given is the one the auditor completes directly in the session, taking the reading question to F/N. The second handling, which is given in separate parentheses, is the handling programed by the C/S. The C/S would list out the items that read and send the recommended handling for each reading item to the Purification I/C to get done.

When assessing the list on someone who did a Purification Rundown earlier, the handling would be to take each reading question to F/N, in session. Any further handling required would then be determined by the C/S, based upon the existing situation.

1. WHILE ON THE PURIFICATION RUNDOWN HAVE YOU GONE EXTERIOR?

(If you get a valid read, not a false or protest read, indicate it. Then: [a] If the PC answers to the effect that he had a win and went exterior on the rundown and this was never acknowledged, and if the PC's indicators are in and he has not and is not exhibiting symptoms of out-Int, as observed by the auditor in session, the handling is to simply acknowledge his win and indicate the F/N. With the PC F/N'ing and VGI's on this, the auditor may continue the assessment. If there is any question about this on the auditor's part, he should end off and get an okay, or not, from the C/S to continue the list.

Once it has been determined that there is no situation requiring Int handling, and the remainder of the list has been assessed and any other reads handled, the PC may then continue his Purification Rundown. This is adjudicated by the C/S. [b] However, if the PC is actually having Int trouble, it is handled before the pc continues the Purification Rundown as follows: If the pc is not Clear or OT give him a standard Int RD per Int RD Series 2. If he is Clear or OT and has not had an Int RD give him the End of Endless Int Repair RD per Int Series 4RB. If the PC has had an Int RD or End of Endless Int Repair RD, do an Int RD Correction List [HCOB 29 Oct. 71RAJ. If Int correction has already been done on the PC get an FES of the Int RD and its corrections. If you are not qualified to audit or repair Int, turn the PC over to a qualified auditor. When all errors are corrected the C/S may order the End of Endless Int Repair RD per Int Series 4RB, as applicable.

Note: The Purification Rundown and Int handling are never done concurrently. When Int handling is required, it is done before the PC continues his Purification Rundown. Ref: HCOB 28 Sept. 82, C/S Series 115, MIXING RUNDOWNS AND REPAIRS)
