HCO BULLETIN OF 24 NOVEMBER 1973RD

REVISED 30 OCTOBER 1978

C/S Series 53RL SF
(Short Form)

SHORT HI-LO TA ASSESSMENT C/S

The C/S Series 53 Short Form is the basic prepared list used by auditors to get a TA up or down into normal range or to correct case outnesses. A PC who is relatively new to auditing should be assessed on the C/S Series 53 Long Form, which puts the items into full questions.

Assess this list Method 5 and handle reads in the order they occur on the list.

HCOB 30 Oct 78, *C/S SERIES 53, USE OF* contains data vital to the proper use of the C/S Series 53 lists.

PCName:_____ **Date**:_____

Nothing Wrong   _____ _____ _____

P. False Exam Report   _____ _____ _____

Waited at Exam   _____ _____ _____

Upset by Examiner   _____ _____ _____

––––––––––

A.   If A or any of the A Group reads on ANY PC (including Dianetic Clear, Clear or OT) who has had an Interiorization Rundown, do an Interiorization Rundown Correction List Revised (HCOB 29 Oct 1971RA) and handle the reads. If Interiorization correction has already been done on the PC, get a Folder Error Summary (FES) on the Interiorization Rundown *and* its corrections done. When all errors are corrected, the C/S may order the End of Endless Interiorization Repair RD per Int RD Series 4.

   If the PC is Clear, Dianetic Clear or OT and has not had an Interiorization Rundown, do the End of Endless Interiorization Repair Rundown. ***Do not run any Dianetics.***

   Otherwise, if the PC has never had an Interiorization Rundown, give them a standard Interiorization Rundown per the Interiorization Rundown Series.

   WHEN DOING AN INT HANDLING RUN ONLY THE INT BUTTONS GIVEN ON THE INT RD SERIES HCOBs. Note on the assessment which button(s) have just read on the C/S 53.

   Other items in the A Group are designed to detect out-Interiorization/ Exteriorization, but don't embrace the earlier beginning, so do NOT run these.

B.   If any of these read, do an L4BRB (Listing and Nulling Repair List) on the earliest lists you can find that have not been corrected. Lacking these, do an L4BRB in general. You can go over an L4BRB several times handling each read to F/N until the whole L4BRB gives nothing but F/Ns. Handle a Wrong Why or Wrong Indication or Wrong PTS item per - C/S Series 78.

C.   Any reading item must be F/N'ed. Use standard handlings on rudiments questions.

   I.   If "*Out-Ruds*" reads, find which rudiment and handle.

II. "*Feel Sad*" reads there is an ARC break of long duration, so handle the ARC break.

III. If "*Deadness*" or "*Unconsciousness*" read, use two-way communication (2WC) to F/N - (Earlier similar if necessary), and then have the C/S program for the Personal Revival Rundown.

D.   2 way comm. to F/N. Do a Drug Rundown Repair List if the PC has had their Drug Rundown (HCOB 19 Sep 78 II) L3RG (New Era Dianetics Repair List) if needed. Advance Program to handle all reading drugs as soon as possible per NED Series 9R. (The above handling does not apply to Clears and OTs. On these, indicate the read. See HCOB 30 Oct 78, *C/S SERIES 53, USE* OF for further data on the handling of Dianetic questions which are reading on Clears and OTs.)

E.   If any of these read, do an L3RH and handle per the instructions. (On Clears and OTs simply indicate the read. Don't run any engrams or seek further to repair. See HCOB 30 Oct 78, *C/S SERIES 53, USE OF*.)

F.   Clean up any protest and invalidation and rehab. to F/N.

G.   Find out what it is. If yogi or mystic exercises or some such two-way communication earlier similar it to first time done, find out what upset had occurred before that and if the TA is now down, do an L1C (ARC Break Assessment) on that period of the PC's life.

H.   If Word Clearing, do a Word Clearing Correction List (WCCL), handle all reads. If study errors, two-way comm. earlier similar to F/N, then have send a note to the PC's C/S requesting a Study Correction List be added to the PC's auditing program when appropriate.

I.   False TA is wrong cans or other error. Use HCOBs 12 Nov 71RA, 15 Feb 72R, 18 Feb. 72' R, 21 Jan. 77' RA, HCOB 23 Nov 73RB, all on false TA. Then clean up the bypassed charge with (1) Assess for best read (a) TA worries (b) F/N

worries. (2) Then two-way comm. times the PC was worried about (item) earlier similar to F/N. (3) Rehab any overruns due to the false TA obscuring any F/Ns.

J.   These are auditor errors. Low TA is generally caused by overwhelming TRs and incomplete actions. A high TA can be caused by an auditor over-running F/Ns or failing to call them. Or, trying to assess through an F/N and mistaking an F/N right swing for a read. An F/N can be obscured and mistaken for a read if sensitivity too high. These items are all two-way comm'ed. earlier similar to F/N. Auditors who made them need cramming badly or may even need to be retreaded. In addition, be sure to rehab. F/Ns that have been missed by such an auditor or auditors.

K.   Can't have or Havingness issue - Find correct Havingness Process and remedy.

L.   Two-way comm. to F/N. C/S to program as needed for

further PTS handling.

M.   Find out what; clean up any protest. Rehab. to F/N or Date/Locate. On "Went on past Dianetic Clear" two-way comm. to F/N. Return to the C/S. A qualified C/S who has fully checked out on the materials must adjudicate whether this state has been attained before the pre-clear may attest to being Dianetic Clear.

N.   Two-way comm. to find what. Note BD item. If BD item covered by one of these categories handle per instructions. If not just 2 way comm. to F/N and get further C/S instructions for handling if necessary.

O.   Get the PC to tell you about it briefly. If correct, then indicate to F/N. Go earlier similar and indicate it if no F/N's is gotten. If there is false TA, handle per 1 above.

P.   Indicate and use two-way comm. to F/N.

Per HCOB 30 October 78', *C/S SERIES 53, USE OF*, the order in which reads are to be taken up is built into the C/S 53 bulletin itself. You simply start at the top of the list and take up and handle to F/N each read as you come to it.
