HCO BULLETIN OF 22 JULY 1971

Issue II

*Study Series 3*

**CONFRONTING, ADDITION**

*(Ref: HCOB 2 June 71 I Study Series 2 CONFRONTING)*

In reference to the gradient of study objects to confront, under the item “paper” the following procedure applies:

The student would confront an HCOPL (a Scientology *Policy letter*) or an HCOB (*a Scientology Technical Bulletin.*) It is tacked to the wall upside down so it can't be read. The student sits in a chair and confronts it. It is not the significance of the bulletin that the student is confronting, it is the bulletin itself, the physical object. This is continued until the student is able to be there and comfortably perceive the upside down bulletin. It is usually done for 2 hours, no *unnecessary* blinking, no *unnecessary* swallowing, no twitching. Once this is accomplished, the student moves to the next gradient per the list in HCOB 2 June 71 I, Study Series 2, CONFRONTING.
